

## HS 101\_lab5

Name: Dipean Dasgupta

Date: 27/01/2022

Std ID: 202151188

**Q. How your Best Friend would describe you?**

**Answer:** I am Dipean and my best friend is Dipto. We are best friends from childhood. We both were admitted in same section of class 3 in St. Joseph High School. In class his seat was just behind my one. So, we used to share our thoughts opinions together and helped each other at times. Gradually we both became best friends of each other. If my best friend Dipto would describe me then he would talk about both positive and negative characteristics of myself. In positive aspects, he would say that I am helpful and cooperative. In group projects, I used to work as a team and try to involve everyone of the team. I try to overcome any barrier by fighting it with a positive and smiling approach. Whenever there a problem arises, I try to first think of a solution in calm mind and steadily follow that approach. Besides these, Dipto would also say that I am punctual and never used to be late in class or at any function or event. About negative aspects he would tell that some times I become angry when I see anything wrong and used to lose control over myself in those situations. Besides, I he would also say that I was a bit shy and used to avoid places where many people were present though I am trying to overcome shyness gradually and become equally proactive and interact with all. Apart from this, he would talk about my straightforwardness. I used to straight convey my opinion without thinking what others would think of me. So, if my best friend would describe me then these are the positive and negative aspects that he would talk about.
